

Gene ontology in coral module with 131 genes

calcium-independent cell-cell adhesion via plasma membrane cell-adhesion molecules (GO:0016338)

regulation of inflammatory response to antigenic stimulus (GO:0002861)

negative regulation of inflammatory response to antigenic stimulus (GO:0002862)

regulation of multicellular organism growth (GO:0040014)

regulation of steroid biosynthetic process (GO:0050810)

negative regulation of inflammatory response (GO:0050728)

sensory perception of light stimulus (GO:0050953)

positive regulation of steroid biosynthetic process (GO:0010893)

cell migration involved in heart development (GO:0060973)

hair cell differentiation (GO:0035315)
