Gene ontology in darksalmon module with 6746 genes regulation of steroid biosynthetic process (GO:0050810) Hits regulation of multicellular organism growth (GO:0040014)

negative regulation of inflammatory response to antigenic stimulus (GO:0002862) regulation of inflammatory response to antigenic stimulus (GO:0002861) calcium-independent cell-cell adhesion via plasma membrane cell-adhesion molecules (GO:0016338) Combined sensory perception of light stimulus (GO:0050953) Score negative regulation of inflammatory response (GO:0050728) - 300 hair cell differentiation (GO:0035315) positive regulation of steroid biosynthetic process (GO:0010893)
