Gene ontology in mistyrose module with 6746 genes
aerobic electron transport chain (GO:0019646)

Hits

mitochondrial ATP synthesis coupled electron transport (GO:0042775)
mitochondrial respiratory chain complex assembly (GO:0033108)
mitochondrial translational termination (GO:0070126)
mitochondrial translation (GO:0032543)
translational termination (GO:0006415)
mitochondrial translational elongation (GO:0070125)

Combined Score
Score

translational termination (GO:0006415)

mitochondrial translational elongation (GO:0070125)

mitochondrial respiratory chain complex I assembly (GO:0032981)

NADH dehydrogenase complex assembly (GO:0010257)

translational elongation (GO:0006414)
